---

The drumming grouse makes its drumming sound by rapid strokes of its stiff, concave wings, without the wings touching either each other or the log, motion pictures taken by Dr. A. A. Allen have revealed.

---

Fowl-pox virus vaccine prepared in buffered mineral oil retains its viability for thirteen months. Takes were observed in 93% of birds vaccinated with it, and resistance to artificial exposure with fully viable virus was demonstrated in 96% of the vaccinated birds.

---

Positive X-ray pictures of lungs of persons with negative tuberculin tests have been shown to result from calcification which follows activity of *Histoplasma capsulatum*. Histoplasmosis has been known as a rare and always fatal disease, but recent work indicates a form so mild as to be unrecognized and yet quite common.
